Logging

The AppMetrica SDK logs:

Activation of the SDK.

Events received from the app.

Events sent to the service.

Events saved to the local database.

Events sent to the server.

Deletion of saved events from the local database.

Various errors and warnings that may affect the expected behavior of the library.

To use the SDK logs:

1. When activating the SDK, enable logging using an extended configuration.

Kotlin

Java

```
class YourApplication : Application() {
    override fun onCreate() {
        super.onCreate()
        // Creating an extended library configuration.
        val config = AppMetricaConfig.newConfigBuilder(API_KEY).build()
        // Initializing the AppMetrica SDK.
        AppMetrica.activate(this, config)
    }
}
```

2. Export the logs using adb by running the `adb logcat -v time >> ${PATH_TO_FILE}` command or open them i

3. If needed, filter the AppMetrica SDK logs by the `AppMetrica` tag.
